## PROJECTS

**Dinner and a Movie** | <https://github.com/calemonte/project1> | <http://kennywhitebloom.net/project1/>

- Using the edamam API and OMDB API users can get a recipe to make tonight by telling us what ingredients they have in their homes, and we'll pick out a movie for them to watch based on movies they already enjoy.
- Worked on front end UI, implementing the edamam API, assisting with authentication.
- JavaScript, JQuery, HTML, CSS, Firebase, Moment.js, Bootstrap Multiselect

**Philly Me In** | <https://github.com/jpirrone104/Project2> | <https://philly-me-in.herokuapp.com/>

- Allows Philadelphians with an interest in sharing their local knowledge to create tours of the city. Tourists who want to share "insider" info for other tourists to make use of can add information to tours and also create tags for other users to search on and create favorites.
- Worked on front end UI and authentication using Passport.
- Node.js, Express, Sequelize, Express Handlebars (templating), Passport.js (authentication), JavaScript, jQuery, MySQL, HTML/CSS, Bootstrap, Heroku

**MySequence** | <https://github.com/TennisSprinterkb/MySequence> | <https://mysequence.herokuapp.com/>

- Helps keep body, mind, and energy goals. MySequence is a swiss army knife for the general yoga practitioner. Looking for a studio, want to build a sequence, or watch instructors from the app? This app has it all in one place. Whether a new instructor looking to obtain more students, or a student aiming to practice more with a busy schedule, this app has it all.
- Worked on front end UI, authentication, breathing page, Material UI and React structuring.
- React, Sequelize, JavaScript, MySQL, HTML/CSS, Bootstrap, Heroku, JawsDB, MapboxGL
